

DS08**Display Dot matrix, 6-digit, 80 mm, LED dot matrix**

To help customers' orientation counter displays are mounted above or beside the counter. Optionally stainless steel tube can be used to fix it onto the table or on the ceiling.

The display consists of six digits (80 mm, 6 x 10 LED dot matrix); their colour is bright red.

At calling event, the ticket number with 4 digits (A123 or 1234 type) is blinking for adjustable time period (and blinking speed) on the display and the 2-digit counter number is blinking too if it is configured as waiting area display, or the same will not blink if it is configured as counter display.

The DS08 display can swap between showing Arabic and English numbers, the swapping time can be adjusted in the Q-net software.

The display can show scrolling messages, and arrow to show the direction of the calling counter.
