

**GD08 (S47,  
S48)****Q-net Multifunctional Device  
with 8" LCD & Touch Panel, on desktop for Pro**

The Q-net Pro queue management software can be extended with several extra features and optional software modules. Some of them requires a hardware element. For this, we have created GD08 Multifunctional Device with 8" LCD & Touch Panel, on desktop.

The GD08 can be used for the following purposes currently:

- Customer feedback unit (to be used together with optional software module SH47, please check its datasheet)
- Software keyboard (to be used with optional software module SH48, please check its datasheet)
- Voice recording unit extended with a USB mini microphone (PCMU1 - to be used with optional software module SH38, please check its datasheet)
- GD08 can be used in combination of the above purposes; therefore it can be used as a customer feedback unit and voice recording unit at the same time.

**GD08 Dimensions:**

Height: 55 mm

Width: 196 mm

Depth: 129 mm

Power requirement: 12V DC, 1,5 A

**Features:**

- 10-Point Capacitive Touch
- Resolution: 800\*1280
- Brightness: 300cd/m<sup>2</sup>
- Panel: 8" LCD IPS panel
- Non-slip silicone pad attached to the bottom for stable touch operation

Built-in WiFi, less signal interference, strong stability supports easy switching between multiple windows and multiple tasks, continuing the operating habits and experience of many personal PCs.
