

**OE05-A01****Voice call unit**

The OE05 plays the calling announcements of the Q-net queue management system at calling the next customer to a counter: "Customer number 100 please go to position number 1".

The device plays pre-recorded wav files from the included micro-SD card.

## Features

- High output power, therefore suitable for large waiting rooms, too.
- Multilanguage announcement available.
- Compatible with all Q-net queue management systems. Easy to extend the existing systems with OE05 devices.
